

# JET SET STYLE

Just as the fall/winter men's fashion trends are starting to take off for the season, so is the Canadian Band, The Tenors.

Having had a chance to style the Multi-Platinum recording artists both on and off the road, I have seen their keen sense of personal style evolve just like their musical style. As artists, they are both diverse in talent and style. The Tenors' fashion style is sophistication with edge. While they stay true to their Armani roots, as they grow and evolve musically and style wise, I see a bit more of the youthful, down-to-earth preppy and edgy style come out.

Just as a new season inspires change, so does The Tenors' music. The group is as down-to-earth as they are inspirational. Their music inspires the soul and is a gift to fans old and new. Check them out at [tenorsmusic.com](http://tenorsmusic.com). For fashion and style tips from a celebrity stylist, visit [stylebykimxo.com](http://stylebykimxo.com)
